

CGIAR RESEARCH PROGRAM ON WATER, LAND AND ECOSYSTEMS

PARTICIPATORY GENDER TRAINING FOR COMMUNITY GROUPS

A Manual for Critical Discussions on Gender Norms, Roles and Relations

Female-headed households face new patterns of vulnerability, with an increase in labor burden and limited access to and control over water resources, which is essential for climate resilience. This workshop helps communities realize the role that gender plays in their lives, and discuss how they can move toward a more equal society.

Acknowledgements

We would like to thank the 12 farmer groups in Dholaguri and Uttar Chakokheti in West Bengal, Bhagwatipur and Mauahi in Madhubani, and Khoksar Parbaha and Koiladi in Saptari. All female and male farmers enthusiastically participated in our training sessions, and taught, inspired and helped us improve the activities. Implementation support and valuable feedback was provided by Prof. Dr. Rajeshwar Mishra, Mitali Ghosh and Dhananyay Ray (Centre for the Development of Human Initiatives [CDHI], West Bengal, India); Manita Raut, Prasun Deb Kanugoe, Anoj Kumar, Janaki Chaudhary and Sanyay Singh (IWMI); Neetu Singh and Rajesh Kumar (SAKHI, Bihar, India); and Indira Chaudhari (iDE, Nepal). The manual was designed and formatted by Andrew Reckers (IWMI, Nepal) with support from Michael Victor (Knowledge Management and Engagement Coordinator, IWMI).

The activities in this manual were developed, piloted and modified by Stephanie Leder (Postdoctoral Fellow - Gender and Poverty, IWMI) and Dipika Das (Gender Coordinator, IWMI/ACIAR) within the project 'Dry-season irrigation for marginal and tenant farmers in the Eastern Gangetic Plains' funded by the Australian Centre for International Agricultural Research (ACIAR).

Preface

Any intervention in a village requires strong community support. This cannot be trained or tick marked, as it is not easily measurable. Underlying every community and household is constant change. Male out-migration changes women's work load, their mobility and need to speak up for their family. However, their agency might be restricted by gendered norms. Social change, the change of norms, rules, and relations, is a long-term process. "Gender" cannot be trained as information or knowledge, as this would be prescriptive and counterproductive. Instead, this manual's intention is meant to guide staff working in communities on starting an open dialogue with participants on their gender perceptions through pictures and group discussions. How can farmers work effectively in groups, both men and women being sensitive towards gendered restrictions? This training manual sensitizes both farmers and field staff for gender roles and relations, and helps inform, monitor and modify project interventions. Furthermore, methods can be used by researchers for a gender analysis. Most of all, farmers and staff can reflect on their capabilities, value systems and existing practices to make suitable contributions and become effective partners in intervention processes.

Community engagement in the activities and discussions of this training are based on brain based principles (Spitzer, 2007). For this purpose, a participatory, visualizing, network thinking and communicative approach was chosen (Bunch, 1995; Leder, 2016). To interlink knowledge, participants are encouraged to describe, explain, discuss and arrange visual inputs in form of pictures (Vester, 2002). A role play challenges farmers to represent the other gender in a humoristic manner, and to act and speak like they perceive the other gender. Role-switching can promote a change of perspective and negotiation skills, without criticizing current gender roles and relations. This training provides a space for farmers and staff to share their perceptions, to learn from another, and to engage in a dialogue. This can lead to collective ideas evolving and a critical consciousness (Freire, 1970), which contributes to social change.

While we conducted the trainings in six villages in India and Nepal, we were inspired by diverse farmers' great enthusiasm to talk about gender roles and beliefs in their community, as well as different critical views on gender relations. The workshops brought out how local gender norms (intersecting with age, caste and other social divides) strongly mitigate structural constraints such as limited access to or lack of irrigation, pesticides, crop choices, and bargaining market prices. The field staff and participants' enthusiasm talking in depth on local gender beliefs triggered critical reflections and the realization that gender norms are already changing, and will change more

in the future under the community's active engagement. Farmers were laughing heartily when asked to create spontaneously a role play with switched gender roles. In one role play, a woman started to sing out a traditional Maithili song which addresses the fact that women also re-enforce gender roles. This song demonstrates our central learning that we want to share with this manual: That it is important to creatively initiate discussions to raise awareness, as opposed to lectures. Whether and how this leads to change in the community will be in the hands of the participants, not us.

A TRADITIONAL MAITHILI SONG

This is a very popular folk song sang by farmers for generations while working on the fields in the Mithilanchal region in Nepal, mostly by the Tharu community. It is about a group of women who go to fetch water, but one daughter-in-law breaks her pot. She flees to hide in her parents' village as she is scared of the consequences. Her sister-in-law reports to her husband about her bad manners in breaking the pot and his mother also tells him that she has bad manners. However, he does not blame his wife and instead looks for her. He asks her to return home despite the mistreatment of the in-laws. He understands her and explains that this will be solved by time, as the joint family will dissolve and they can live and make their own decisions. The song addresses gender discrimination women have historically faced, especially when at their husband's home. Here, in this song, it shows how men can play an important role in fight gender discrimination upon less powerful women to gain more power.

Maithili original	English translation
Saat sakhiye mili, paniya ne gayelai, Wahi re Jamuna ladi dhaar ho Ek sakhiya kera gagari futal, sab sakhi rahalai lajai ho	Seven friends together, went to fetch water, from Jamuna river's flow One pal broke her water-pot, others remained shy
Sanga hi me chellai rama, chotaki nanadiya, daural gayal harath ho. Toharo ke tiriya he bhaiya birahu ke matal Gagari fori naihar jayi ho	Among the friends, there was younger sister-in-law, who ran to the plow-field, said: "Your wife, my brother, is totally bad- mannered; she broke her water pot and left for her mother's place"
Haraba jotaite ge bahini faraba harayegellai Tuti gellai harahu ke nas ho Pyar pichari gellai, gagari futal, tiriya ke kone aparadh ho	"During plowing, sister, it happens, I lost Faraba and broke another machine that is used for plowing. She had slipped out and broke the water pot, what is the crime of my wife here?"
Har joti ayela babu, kodar pari aayel, Dehari me bhaithal jhamai ho Sabhu ke tiriya ge ama ghara hi me chai ke, hamhuke tiriya khana jaye ho	"Oh! back from plowing, son, wasn't it a busy day with hoe?" - "You are relaxing here at the veranda, Mother! everyone's wife is at their home, why has my wife left?"
Toharo ke tiriya ho babu, biraha ke matal, gagari fori naihar jai ho Khaiyo liyau babu, dahi chura bhojan Pibi liyau, ganga jal pain ho	"Your wife, son, is much bad-mannered; She broke her water pot and left for her mother's place. Eat the food, son, the yogurt beaten rice meal, drink the Ganga- water, drink"
Nai hum kahyebo ge amma, dahi chura bhojan, naiye pibau ganga jal pani ho. Kasi lebau ahe re ama, raja hansa ghodiya, chali jebau tiriya o desh ho	"No, I wouldn't eat, mother, the yogurt beaten rice meal, won't drink Ganga-water. Rather would get my Raja Hansa horse ready and go to my wife's village"
Ek kosh gella rama, gela dui koshaba Bheti gellai gai ke gaaibar ho. Tora hum puchiyau ge bara bhaiya yehan sadhu batiya yahi pantha dekhne rusnair ho	One mile travelled, dear, travelled two miles, On the way a dairy farm was discovered, he made to the guard a generous request, if he had seen any anxious lady
Dekhno me dekhno bhaiya, bel re babur tar, Naina sa dharai chellau loor ho. Chaliyau me chaiyau dhani, ghoori ghar chaliyau, ghuri ghar chaliyau tahen ge	"Yes, for sure! I had seen under the Bel Babur tree a lady pouring tears from her eyes." "Come back my lady! Let's return home, let's return home.
Budiya se maiya he dhani, mari hari jayetai, Bahini je jettai dur sasur ho, woho je bhai ke re bhina kari dayabai, dunu mili karabai biraj ho	My mother has become old, will die shortly, Sister will get married to her home, Remained will be my brother, I will separate him, We both will rule our regime."

Transcription and Translation: Dipika Das

WHAT IS GENDER?

Caroline Moser (1993) defines gender as:

"culturally based expectations of the roles and behaviors of men and women. The term distinguishes the socially constructed from the biologically determined aspects of being male and female. Sex identifies the biological difference between men and women, whereas gender identifies the social relations between men and women lt therefore refers not to men and women but to the relationship between them, and the way this is socially constructed. Gender relations are contextually specific and often change in response to altering circumstances."

WHAT IS EMPOWERMENT?

Naila Kabeer (1999) defines empowerment as:

"the process by which those who have been denied the ability to make strategic life choices acquire such an ability."

Those who are disempowered are either denied or have limited choices. Therefore, empowerment is a process that expands people's ability to make choices that result in desired outcomes. The ability to make strategic choices depends on three interrelated dimensions: agency, resources and achievements. Resources relate to physical, social and human resources and access to such resources reflects the rules and norms, which allows certain individuals authority over others. Agency relates to decision-making wherein an individual recognizes their ability to either make a decision, bargain, negotiate, reflect, manipulate, or resist to pursue their own goals and can be exercised individually or collectively. Achievements are the outcomes of making strategic choices that lead to well-being.

WHAT DOES PARTICIPATORY MEAN?

Robert Chambers (1994) defines participatory as:

"an approach and methods to enable local people to share, enhance, and analyze their knowledge of life and conditions, to plan and to act."

In a participatory approach, local people share and own their information and help shape outcomes. Everyone has the right to participate and outsiders must seek out marginalized voices and create a safe space to share information. Outsiders must also be self-critically aware of the different

perspectives and realities within communities while respecting the local knowledge. This method involves 'handing over the stick' by allowing the unheard voices to share information while the 'expert' sits back and quietly allows others to participate in a safe space. Tools include mapping, diagramming, and ranking.

GENDER IN AGRICULTURE AND WATER MANAGEMENT

Women play different roles in society which is determined by legislation, religious and cultural norms, economic status, ethnicity, community and household and their contribution to productive activities. Women are usually responsible for domestic work and also participate in agricultural activities that help generate income. However, their high participation contrasts with their low political and social power since their household activities and care work is economically unrecognized. Therefore, both men and women's role in society needs to be recognized and addressed separately to understand their needs and involvement in terms of decision-making.

Gender interacts with socio-economic differences such as age, caste, and class in determining access to and control of resources. The transfer of water management responsibilities is given to local institutions such as water users groups, irrigation associations etc. The idea is that by decentralizing management of water resources, the community will benefit and lead to a sustainable use of the resource over time (Harris and Gantt, 2007). However, evidence suggests that the community-based approach applied in water management projects does not necessarily lead to greater participation and empowerment of all stakeholders involved (Meinzen-Dick and Zwarteveen, 1998). This is due to the fact that this approach views the community as one entity where the members share common interests and goals (Sultana, 2009) when, in reality, men and women have different needs and priorities in terms of resource use.

Moreover, women still face barriers in controlling resources and participating in formal local institutions that are responsible for managing water resources. Gender relations play a major role in influencing structures of property and endowments that govern domestic divisions of property and labor which shape people's relationships to communities (Meinzen-Dick and Zwarteveen, 1998). In South Asia, land is traditionally owned by the male member of the household who also serves as the head of the household. Participation in local organizations such as water user groups is extended either to the land owner or head of the household, which in most cases

tend to be male. At the same time non-participation may not always mean non-influence or non-involvement (Long, 1989). Evidence suggests that women influence decisions by relaying information to their husbands or the participating male members of the household. Their role as a backstage actor can be viewed as wielding some form of influence in formal institutions from the private domain. However, this influence occurs in the private domain and is dependent on their position within the household.

In the developmental field, it is important to understand the perceptions of community, household and individuals to break it down based on local understanding. It is important to listen and consult with women of different age, caste, class and other socio-cultural divisions to understand their roles within the household and community to better understand and address their needs (Williams et al., 1994 and Reeves and Baden, 2000).

Introduction

WHO IS THIS MANUAL FOR?

Any community mobilizer, non-governmental organization (NGO) staff or researcher who wants to hold a discussion with farmers on gender norms, roles and relations in their communities can use this manual. It has been designed for communities with small-scale farming activities, but by changing the labor activities shown in Appendix III, it could also be used for more urban, non-agricultural settings.

WHAT IS IN THIS MANUAL?

A step-by-step description of a three-hour gender training workshop for approximately 5 to 12 participants. In three activities and three discussions, participants:

1) are encouraged to reflect on their own perceptions of boys and girls in their families

2) critically review agricultural and domestic tasks, and why men and women are expected to work in different jobs

3) develop argumentation skills to resolve conflicts and evoke empathy, by switching roles and showing men and women what life is like for the other gender

Guided discussions help connect the activities and provide participants space to ask questions and talk about new ideas. This manual also includes tips for facilitation and an appendix section with the paper props that you will need to run a successful and engaging workshop.

HOW WAS THIS MANUAL MADE?

<image>

This workshop is based on participatory research conducted by the International Water Management Institute (IWMI), as part of the CGIAR Research Program on Water, Land and Ecosystems (WLE). The training was codeveloped by researchers, field staff and farmers within the ACIAR-funded project "Improving Dry Season Irrigation for Marginal and Tenant Farmers (DSI4MTF)". It borrowed activity one from a gender training by iDE, and builds on didactic teaching methods developed for a doctoral dissertation on Education for Sustainable Development (ESD) for India's formal educational system by Stephanie Leder. The training activities were piloted and modified in six villages in the Eastern Terai, Nepal and Bihar and West Bengal, India. The trainings were conducted twice per village, twelve times in total. The villages are Koiladi and Khoksar Parbaha in Saptari district (Eastern Terai), Bagwatipur and Mauahi in Madhubani (Bihar), and Dholaguri and Uttar Chakowakheti close to Cooch Behar in West Bengal. During and after every training, modifications and variations were incorporated in the training structure, e.g. timings per activity were adjusted and instructions changed or specified.

WHY IS THIS MANUAL IMPORTANT?

Due to male labor migration from rural communities, women are increasingly managing the farming process. Female-headed households face new patterns of vulnerability, with an increase in labor burden and limited access to and control over water resources, which is essential for climate resilience. Socio-economic, structural and institutional constraints to sustainable water use in patriarchal and caste-based societies impacted by migration pose a challenge to the long-term up- and out-scaling of more productive opportunities. This training addresses gender inequality in small-scale agriculture, women's triple work burden (domestic, productive and community tasks), and institutions marked by caste, class and gender disparities that particularly affect female-headed households, as well as marginal and tenant farmers.

If women are also not allowed to contribute to particular forms of labor, use certain types of equipment or impact the decisions of farmer groups, agricultural productivity and farming livelihoods are challenged. This workshop helps communities realize the role that gender plays in their lives, and discuss how they can move toward a more equal society. This manual is not prescriptive or designed to infuse a particular "Western" view on gender relations. The activities and discussions provide valuable space for encouraging farmers to bring their own ideas and stimulate critical reflections and dialogue on gender perceptions and practices in their particular cultural setting.

WHEN CAN THIS MANUAL BE USED?

While this manual can be used at any time to generate discussion and reflection on the impact of gender in a community, there are four times in particular when this workshop may be particularly necessary:

1) When new projects are starting in villages and community groups are formed. In this case, the training can be used to sensitize field staff and farmers on gender relations in communities.

2) When there are gender-related tensions in a community. This may happen often in communities where men are out-migrating and women are routinely left behind.

3) When conducting participatory research to understand how gender effects community relations and practices in villages.

4) Lastly, with project staff who are working with communities. It can help to reveal one's own gender perceptions before addressing those directly or indirectly in villages.

After the implementation of the activities and discussions, facilitators and farmers can discuss opportunities to repeat these activities to observe whether their perceptions have changed. It is important to view this workshop as an initial tool within a greater development process which can be linked to other project interventions. For this purpose, this manual can identify community-specific challenges regarding to gender relations which shape and developmental interventions in unpredicted ways.

WHAT DOES THIS MANUAL ASSUME?

This manual assumes that facilitators understand that the concept of gender is socially constructed and changes over time and space (rather than being biologically fixed). Facilitators are expected to be able to lead critical discussions reflecting the origins of the cultural notions of "girls" and "boys", "women" and "men".

WHAT WILL PARTICIPANTS GAIN FROM THIS WORKSHOP?

- A space to talk about gender perceptions and roles in their households and community
 - Myths on women's and men's roles in agriculture may be revealed, as well the imbalance in the division of labor
- A chance to reflect
 - While other training programs teach pre-determined technical skills, this workshop lets participants come to their own conclusions by guiding them through a reflection on gender and developing empathy through role play
- New insights and skills
 - What participants and facilitators learn may differ from workshop to workshop, but hopefully some participants leave with new ideas about how gender impacts their daily lives, and how they might change those impacts. Additionally, bargaining and problem solving skills will be learned from the role play activity.

PREPARATION

What do I need?

- Chart paper, colorful cards, and permanent markers
- Men and women's clothing (i.e. headscarves, shawls, men's hats, etc.) for role playing activity
- Print the following:
 - a. Pictures of man and woman and labor activities (Appendix III) for activities 1 and 2
 - b. Workshop Evaluation (appendix I), to be completed by observer during workshop
- Audio recording device to evaluate training afterwards (optional)

WHO DO I NEED?

Participants

It is important to keep the groups small to encourage good discussion. The recommended maximum number of participants is 12, and the workshop can be effective with as few as 5 or 6 participants. To encourage women's participation in meetings, crèches (daycare) for children or similar appropriate incentives can be arranged. It is important to allow sufficient time to select participants of different age, caste, and class, as well as to form groups in which all participants feel comfortable speaking. The groups should ideally be mixed, but keep in mind that sex-segregated groups often allow for a more secure space to speak. The choice between mixed or single sex groups depends on prior interventions in communities and how much women feel comfortable speaking about these topics in front of men. If there is significant hesitancy among the women to speak up, then single sex groups may provide greater individual participation.

Facilitators

It is recommended to have two facilitators for this workshop. While it may be that only one person is facilitating at a time, it is important to have the other facilitator act as an observer and take notes. The facilitators should speak the local dialect or language. Particularly in groups with female participants, it is necessary to have female facilitators.

WHAT DOES THE FACILITATOR DO?

The facilitator has a variety of very important jobs to make the workshop a success (adapted from the UNDP Afghanistan Gender Awareness and Development Manual). These are:

4. Participating in activities and discussion

1. Encouraging participation

This is done by creating a safe space to talk about controversial issues, involving all participants in a discussion, and having an idea of the material and how participants might respond. To flatten hierarchies in communication, the facilitators should sit with the participants in a circle on the ground.

2. Directing the conversation

While participation should be encouraged, it is equally important for the facilitator to direct the conversation away from negative themes (such as reinforcing stereotypes about gender, or insulting other participants) and towards a positive, productive discussion that encourages collective participation. This is a difficult balance and one of the reasons why the facilitator is so important.

3. Sticking to the agenda

The facilitator must respect the participants' time in attending the workshop, and sticking to the time limits set in the agenda is a good way to do that. When participants know that time limits are being obeyed, they may also be more attentive during the sessions.

While the participants should be talking more than the facilitator, it can be helpful for the facilitator to share observations of his or her own during the activities and discussions. Although this participation is infrequent, it helps show that the facilitator does not have all the answers and is also here to learn from the discussion.

5. Sharing responsibilities

Just as the facilitator does not need to pretend to know everything about gender equality, he or she also does not need to do everything. Feel free to have a participant volunteer take notes if no other facilitators are available, or have participants hold up props while you talk. This can also help keep quieter participants involved, and louder participants busy.

10 KEY FACILITATION SKILLS

Technique	Purpose
Open-ended questions	To stimulate many responses
Wait for responses	To give people time to think and come up with an answer.
	Don't bombard them with more questions
Use eye contact and names	To encourage people to contribute
Listen carefully	To understand, rephrase, and lead a discussion
Encouragement	To promote more responses ("that is an excellent point")
Rephrasing	To clarify understanding and show appreciation
Redirecting	To get others involved
Probing	To get out more information and views
Observing	To check on who is not participating
Active Listening	To listen with the eyes as well as the ears and checking
	out body language cues
Summarizing	To help participants understand and reach an agreement

GENDER WORKSHOP MODULES

INTRODUCING THE WORKSHOP (10 MIN)

This part of the manual will talk about how to introduce the workshop before activities begin. There are three topics to cover:

- 1) The agenda
- 2) Creating a safe space for discussion
- 3) Introductions and ice breakers

THE AGENDA

It is recommended to start by presenting the agenda, as it helps participants understand where the conversations might lead. Discuss the agenda generally, by explaining that the workshop consists of 3 activities and 3 discussion sections that focus on gender. Then go through the agenda point by point. The time periods mentioned throughout this manual are from the tentative agenda which is printed below. Emphasize that all of these activities and discussions require the voices and stories of the participants, which leads to

the next topic. A long introduction to the workshop is not recommended, as participants are already familiar with the agenda. Simply laying out the reason for the workshop, that gender plays a large role in rural life and is worth examining, may suffice.

Phase	Time	Activity		
Introduction	10 min	Introducing the workshop		
Activity 1	30 min	Boy or girl?		
Discussion 1	20 min	"Gender" and "sex"		
Activity 2	45 min	Gender position bar		
Tea and c		offee break		
Discussion 2	20 min	Visioning female and male successful farmers		
Activity 3	35 min	Bargaining role play		
Discussion 3	15 min	Beyond the workshop		

CREATING A SAFE SPACE FOR DISCUSSION

Discussing gender may be a very new concept for the participants, especially in this unfamiliar setting. For this

reason, it is important to talk about how the workshop will bring up sensitive and controversial issues. Let participants know that they may not agree with everything that is said, and that that is okay.

At this point, the facilitator should briefly discuss his or her role in the group. Emphasize that you will try to let as much discussion as possible take place. This discussion will be constructive and aim at supporting each other in the village.

PEER INTRODUCTION AS AN ICE BREAKER

Beyond introducing the workshop, it is important to have introductions of each participant and facilitator. This can be done in a creative way: participants discuss in pairs for one to two minutes, sharing their name, number of family members, which crops they grow, and other relevant information. Participants then introduce not themselves, but the neighbor that they talked to:

"My friend's name is Sujata. She has five family members and grows paddy, wheat, and eggplant."

Having some sort of ice breaker activity on hand (such as this) is important in developing a friendly and understanding atmosphere for the following activities and discussions.

ACTIVITY 1: BOY OR GIRL? (30 MIN)

WHAT IS THIS ACTIVITY?

Asking participants to describe why they would rather have a son or a daughter.

WHY IS IT IMPORTANT?

Introduces participants to their own values that are attached to having sons and daughters. These will be critically reflected upon and explained as socially constructed gender perceptions in the discussion following this activity.

WHAT DO I NEED?

Pictures of man and woman (Appendix III), cards and markers for note-taking.

STEPS:

Step 1: One facilitator holds the picture of the woman at one end of the circle, and the other facilitator holds the picture of the man at the other end. The two pictures are shown here, and larger versions can be cut out in Appendix III.

- **Step 2:** The facilitator explains: "Imagine that you spoke to a doctor and due to a medical condition, you can only have one child in your life. Would you prefer a boy or a girl? (represented by the pictures of the man and the woman).
- **Step 3:** Participants move and stand by the picture of the child that they want: a son or a daughter.
- **Step 4:** The girl group and the boy group separately sit down in small circles. The facilitator asks them: "Why did you choose a girl/boy?" This discussion can be led by a facilitator, but make sure that you also pick someone to take notes of the discussion, ideally on a big piece of cardboard.

Step 5: Each group presents the reasons they picked a girl or boy to the rest of the participants.

ACTIVITY TIMELINE:

Time	Objective	Content	Method	Material
Phase 1:	To identify	Do you want a boy or a girl if you	Warm-up activity: put the pictures of	Laminated
Warm-up, 5	girl or boy	could have only one child?	a boy and a girl in different locations	pictures of a
min	preference	Please go to the picture of the	and separate the group into two	boy and a girl
	amongst	boy or the girl.	according to their preference for the	
	participants		sex of their (imaginary) only child	
Phase 2:	To identify	The two different groups discuss	Group work & Brainstorming:	Index Cards
Group work,	gender	why they want a girl or boy.	facilitators write down the reasons	and
15 min	constructions	Write down the reasons of your	for wanting a boy or a girl raised in	permanent
		group on Index cards.	the discussion on index cards	markers
Phase 3:	To exchange	Present 3- 5 reasons mentioned	Presentation of group results	
Presentation,	each other's	in your group for why you want a		
10 min	perspectives	girl/boy		

FACILITATOR TIPS:

Let the participants develop their own ideas for the role play; you should not interfere with this process. During our workshops, the following topics came up:

- 1) Financial Security: Dowry/wedding gifts, education, remittances, religious beliefs
- 2) Lineage: family name and honor
- 3) Gendered tasks: household work, role of daughter-in-law, plowing, cremation
- 4) Gendered traits: discipline, obedience, looks, security

DISCUSSION 1: GENDER VERSUS SEX (20 MIN)

WHAT IS THIS DISCUSSION?

It talks about the difference between gender and sex.

WHY IS IT IMPORTANT?

It helps show how society and culture play a large role in what it means to be a woman or a man, and that there is a difference between what we are born as and what society tells us to be.

STEPS:

Step 1: The facilitator describes the difference between sex and gender. Refer to the chart showing examples of sex and gender as well as the sample introductory speech for ideas on how to best introduce participants to this difficult concept. Starting out with the following questions and definitions may be helpful:

Do you know what the difference is between sex and gender?

SEX is the biological characteristics of men and women.

GENDER is the socially defined characteristics and roles of men and women.

SEX	GENDER			
Biological—Male and Female	Social—Masculine and Feminine			
Born With	Not Born With			
Cannot be changed	Can be changed			
Examples:	Examples:			
 Only women can be pregnant and give birth 	Women does domestic chores			
 Only men can supply sperm. 	 Men is bread winner of family 			
 Only mother breastfeeds her child 	Women wear sari/kurta			
Only women menstruate	• Men plows agricultural land, drives tractor			
	Women are kind hearted			

GENDER IS RELATIVE

Males and females have a different list of activities that they have to perform. Those activities are understood as "normal" because they are performed by the majority of males and females of all ages around us. These activities are categorized by gender-related rules that are formed by the people of that society and its history.

Can we think of some examples of what a majority of the men and women do in this village?

> As one example, men are considered to be the breadwinner of the family, while women are thought to care for the family.

GENDER IS LEARNED

Gender can be understood as learned rather than taught. We learn how a specific gender should perform, even if it is not explicitly taught to us.

For example: when babies are born, they learn from their parents that they are a girl or a boy, and by the age of 2.5 or 3 they are able to classify who is male or female around them. They first learn this by the way elders address them, as it is different for a baby boy than a baby girl, both in terms of the specific word used and in tone. When a baby understands that she is a girl, she learns what a girl does. What should she wear? What should she play with? What should she avoid? She learns the answers to these questions by observing her parents, elders and her friends.

GENDER ROLES ARE UNQUESTIONED

The majority of assigned gender roles are accepted and remain unquestioned.

For example: In certain regions, women do not plow. A part of the culture states that only men may plow the land and so in following these well-established roles, women do not plow. Instead, women

are caretakers. They perform household chores and take care of children and the sick.

At this point, ask participants to think of more examples of roles that we do without questioning? Examples may include: cooking, dealing with money, cremation, drinking chai in public, etc.

GENDER ROLES VARY IN DIFFERENT PLACES

Gender roles vary across caste and region. For example: In some communities, only men go to the market to sell agricultural products, while in others it is only women who go. Or: In Western cultures it is normal that men can cook food for family but in India and Nepal, for example, usually women are in charge of the kitchenthey are called homemakers too (grihini). Even in the same place or communities and at the same time, gender roles can vary within and across different cultures, religions, and castes.

HOWEVER, GENDER ROLES ARE CHANGEABLE OVER TIME

Gender roles and responsibilities can change over time.

- Ask participants to think about what has CHANGED over time in their community, in terms of the responsibilities of male and female farmers. Give some examples, like maybe riding cycles and motorbikes, speaking up in a group, being responsible for the money
 - One example might be that in some communities, girls were not allowed to go to school, but nowadays daughters are sent to school along with sons.

IDENTIFYING GENDER ROLES

To understand the expectations for different genders in our community, we must discover the different roles and responsibilities performed by women and men. Work can be divided into three main categories: productive, reproductive and community. Women's role, as has been noted, includes work in all three of these categories, which is referred to as women's **triple work burden**. Descriptions of these types of work follow:

1) **Productive Work**

Any work related to production, whether for income or family consumption, is considered productive work. For example, farming or weaving baskets. Usually when people are asked about their job, their response is related to productive work, especially work which is paid or generates income. Both women and men can be involved in productive activities, but for the most part their function and

responsibilities will differ according to the gender division of labor. Women's productive work is often less visible and less valued than men's. Women are generally paid less than men for performing same work.

2) **Reproductive Work**

Involves the care and maintenance of the household and its members, including bearing and caring for children, food preparation, washing, cleaning, water and fuel collection, shopping and family health care. Reproductive work is crucial to human survival, yet it is seldom considered 'real work'. In developing communities, reproductive work is for the most part

manual labor intensive and very time consuming. It is almost always the responsibility of women and girls.

3) Community Work

Includes any collective organization of social events and services, ceremonies and celebrations, community improvement activities, participation in groups and organizations, local political activities and so on. Volunteer time is important for the spiritual and cultural development of communities and as a means of community organization. Both women and men engage in community activities, although a gendered division of labor also exists here. For example, men are present and influential in natural resource groups such as water user or forestry committees, despite an obligatory minimum attendance of 30% of women in such groups.

THE GENDERED DIVISION OF LABOR

Hence, women, men, boys and girls are likely to be involved in all three areas of work. In many societies, however, women do almost all of the reproductive and much of the productive and

community work. Development projects must remember that women's workload can prevent them from participating in ways that men may be able to. Additionally, any disruption in one area of work will affect the other areas. Extra time spent on farming, producing, trainings or meetings means less time for other tasks, such as child care or food preparation and finally rest. For these reasons, especially in agricultural production, it is important to understand the gendered needs of the partners and members and cooperate with them for a sustainable livelihood.

Step 2: The facilitator lists the following behaviors and activities in a random order. Participants guess if they are determined by someone's gender or someone's sex. This can lead into a group discussion on gender and sex.

SEX	GENDER				
Menstruation	Wearing a sari				
Being pregnant	Driving a tractor				
 Giving birth 	Child and elderly care				
Lactating (feeding the children)	Weeding				
Providing sperm	Cooking				
	Washing clothes				
	 Fertilizing 				

ACTIVITY 2: GENDER POSITION BAR (45 MIN)

WHAT IS THE ACTIVITY?

Participants reflect on the types of labor done by women and men, and their reasoning behind that.

WHY IS THIS IMPORTANT?

It helps participants see that the division of labor leads to a higher work burden for women, and how we can change that.

WHAT DO I NEED?

Pictures of different labor activities (14 are included in Appendix III, and others can be created), pictures of man and woman standing in different positions next to each other.

STEPS:

Step 1: Place the pictures of the man and woman in a row, arranged like this:

Step 2: The Facilitator describes the row of pictures, saying how it represents female labor, mostly female labor, labor shared by both genders, mostly male labor, or male labor.

- **Step 3:** The pictures of labor activities are distributed in the middle of the circle of participants. The participants pick one picture of a labor activity, and take turns describing to the group what the activity is.
- **Step 4:** After explaining, each participant places the picture of the labor activity beneath the picture of the man and woman that they think it applies to: female labor, mostly female labor, labor shared by both genders equally, mostly male labor, and male labor (pictures in Appendix III).
- **Step 5:** The participant explains WHY he or she thinks that that labor activity fits in that category.

Repeat steps 3-5 until all labor activities have been placed in a category.

- **Step 6:** The facilitator asks: "Does this look like an equal workload for men and women?" Follow-up questions, such as, "what problems might this create?" and "Who do you think will perform these activities in 15-20 years?" could also be useful. The facilitator may also like to ask participants if they think that farming might be more difficult for women because they are not allowed to apply fertilize, plow, etc. This is the topic of Discussion 2 and will be discussed in more detail later in the workshop, but it could be a good idea to ask this question now.
- Step 7: The facilitator asks: "How would you change who does what job? How can we make it more fair?" The participants rearrange the pictures of the labor activities so that it becomes more balanced. Help participants realize how changing which gender is responsible for a certain job can help make work more equal for everyone.

Activity Timeline:

Time	Objective	Content	Method	Material
Phase 1: Describing a picture, 15 min	To choose and describe a picture	Describe the picture.	Every participant chooses one picture	The pictures of labor activities
Phase 2: Deciding where tasks belong, 15 min	To decide where the task displayed on the picture should be placed along the gender position bar between "male" and "female"	Is it a woman's or man's task? Place picture on a pile for male, female and both labor tasks	Every participant places one picture in one of the five categories	(14) and the pictures of the man (alone) and the woman (alone), all in
Phase 3: Reasoning gendered division of labor, 10 min	To debate why the task is done by males or females	Why did you place the picture there? Can this be done by women/men?	Every participant gives an explanation from her or his perspective	Appendix III
Phase 4: Re-thinking the gendered division of labor, 5 min	To envision how labor could be more balanced	Would you like to change the division of labor? Rearrange the pictures	All participants realize that the gendered division of labor is changing	

TIPS:

1. Challenge participants to think beyond "it has always been like this" when they describe why a certain labor activity is for that gender. In our workshops, we heard participants describe tasks as "dangerous", "heavy", "takes time", "safe and at home", among <u>other things</u>.

2. May also be helpful to the participants if they think that the division of labor has changed over time, which may help participants realize that it can change in the future

3. Don't put away the pictures after this activity! It will be helpful to be able to look at the pictures during Discussion 2

DISCUSSION 2: Visioning successful male and female farmers (20 min)

WHAT IS THIS DISCUSSION?

Participants imagine opportunities and challenges in becoming a successful farmer if they were the opposite gender.

WHY IS IT IMPORTANT?

Participants can reflect on challenges in ongoing project interventions, or envision their opportunities in farming. It also prepares participants for the gender-swapping role play in Activity 3, as well as gives space to dismantle roadblocks for female farmers.

STEPS:

- **Step 1:** Divide the participants into two mixed gender groups. Choose a participant to take notes on the chart paper.
- **Step 2:** The facilitator asks participants to imagine themselves as a farmer of the opposite gender. Give participants time to let them imagine this new identity and life.
- Step 3: For one group, ask: "What are the opportunities to becoming a successful female farmer?" What are the challenges to becoming a successful female farmer?". For the other group, ask the same two questions, but regarding male farmers.
- **Step 4:** Ask the males, who are imagining that they are female farmers: "As female farmers, what will help you become successful?"
- **Step 5:** Ask one group member to present the opportunities and challenges for the gender they discussed. As a larger group, discuss the differences between what the male and female groups described.

FEMALE FARMER	FEMALE FARMERS
 Not allowed to	 Collective labor
plow Household work-	support through
load and coming	other farmers Confidence to
late to meetings Not allowed to	speak up in groups Increasing
start water pumps 	cropping areas

ACTIVITY 3: BARGAINING ROLE PLAY (35 MIN)

WHAT IS THIS ACTIVITY?

Participants take the role of the other gender and have conversations with other participants in a farming or household situation

WHY IS THIS IMPORTANT?

Female and male participants get a chance to see what it is like to be the other gender, and understand what challenges that gender faces.

WHAT MATERIALS DO I NEED?

Scarves, shirts, and other male and female clothes. Also farming and household props, such as a water pot, a spade, vegetables, plates, cups, etc.

STEPS:

Step 1: The facilitator explains that a role play will happen. Ask for two or three participants, with at least one man and one woman, who are willing to dress up and play the other gender in a farming situation. Use the costumes to show that the woman is now a man, and the man is now a woman. Describe a normal situation in the field, such as men digging, and women bring them food, or

a man telling his wife how to work better in the field.

- **Step 2:** The facilitator tells the groups that they have a 15 minutes to prepare a 3-4 minute role play situation. First they need to select a labor activity in the field or the house. Then they will plan what each character will be doing in the role play (remember that the men are women, and the women are men). The funnier and more spontaneous the play, the better!
- **Step 3:** Ask farmers how they felt playing the other gender. Ask the others how they perceived the role play on stereotypical gender roles in agriculture and the home.

TIPS:

With a little help from the facilitators, this may be the participants' favorite activity. Having random props (such as farm tools, kitchenware, etc) may help generate ideas. In our workshops, women were excited to get a chance to tell men to bring them food and tea constantly, while men enjoyed covering their heads with a scarf and playing an obedient housewife. found it entertaining to see women working with equipment in the fields. We found that participants have lots of ideas once they realize that this is supposed to be a fun and lighthearted exercise.

ACTIVITY TIMELINE:

Time	Objective	Content	Method	Material
Phase 1:	To introduce the idea of a role play: two	To act out a conversation	Short oral	Props: Head
Introduction, 5	or three participants perform a short play	from the field, for example:	introduction	cover for male
min	on a problem related to the interventions.	whose turn it is to irrigate,		and female
	This is solved through bargaining. Gender	to sell vegetables and to		farmers:
	roles are changed between male and	negotiate the price without		Scarves and
	female farmers.	quarrel		Pheta, neck
Phase 2: Group	To decide on a problem with regard to	The group discusses which	Group work	cotton towel
discussion and	the interventions and to practice	problem they want to	and practice	
role play	bargaining	bargain about in their role		
practice, 15 min		play and practice		
Phase 3:	To present the play	The groups present their	Presentation	
Presentation of		role play in front of		
role play, 15 min		everyone		

DISCUSSION 3: BEYOND THE WORKSHOP (15 MIN)

WHAT IS THIS DISCUSSION?

A wrap-up of the workshop that helps spread the insights from the workshop into the wider community.

WHY IS IT IMPORTANT?

Participants can reflect on what they have learned and the insights they have developed. They can discuss whether they would like to change anything in their gender behavior. They can plan as a group how to continue discussing gender after the workshop.

STEPS:

Step 1: Explain to participants that unlike some trainings, this workshop is not supposed to fix the problems in one day. Also unlike some trainings, the facilitators do not have all the answers. Emphasize that the workshop was only the first step, and now it is time for the participants to share

what they learned with their friends and families and continue the conversation.

Step 2: Ask for a volunteer to take notes while participants share ideas

Step 3: In a circle, ask the participants to each share one way that they will use something they learned in the workshop

TIPS:

- Give at least two examples of answers before the participants share. One example can be a simple discussion with your family, while the other example should be an action, such as "I will help my wife prepare and cook food."
- Encourage participants to try not to repeat anyone else's answer. You can also remind participants that this is a team exercise, which is why one participant should be taking notes. If a participant gets stuck and cannot think of an answer, encourage other participants to help him or her come up with something.

FOLLOW-UP EVALUATION

After each workshop, we recommend the following two actions to help improve the workshop in the future:

- 1) Discuss and evaluate the workshop with all facilitators.
- 2) Interview a few participants (ideally both a man and a woman) about the workshop.

How to evaluate the workshop among facilitators?

- 1) Look at the notes written, photographs taken, and audio recorded from the workshop. Discuss if information was collected well during the workshop, and how to collect this information better next time.
- 2) Share both praise and critique for peers' facilitation techniques.
- 3) Share what personally seemed to be the most and least successful parts of the workshop, and discuss why that might be.
- 4) Evaluate timeliness and adherence to agenda. Do some items need more or less time?
- 5) Complete the Evaluation in Appendix I that should have been partially filled out during the workshop. Discuss the document with all facilitators.

How to interview a participant?

Interviews should be conducted individually and privately, in order to get the best understanding of the participant's experiences. If two facilitators are available, one can take notes while the other conducts the interview. Here are some questions to start the conversation, and feel free to follow-up on any points made by the participant:

- 1) Which activity or discussion made you think the most? Why?
- 2) Is there anything that you would like to add or remove from the workshop?
- 3) Why did you come to the workshop?
- 4) What do you think other people thought of the workshop? What do you think your friends and family will think of what was talked about at the workshop?
- 5) Do you think that gender relations will change at some point in your community? What do you think will cause that change?

APPENDIX I. A general workshop evaluation tool that should be worked on during event
